**Notes:**

- 1) For models with custom seat types, please specify seat width, depth and seat configuration to designate if the access opening is to be in the Front, Left, Right or Rear. Select Bridge if an access opening is not required. Use this information to create the seat code for the required seat.
- 2) Unless otherwise requested, the width of the aperture (inside width dimension of the commode opening) will be 6.5" for all custom seats.
- 3) Custom seat widths can be 1" or 2" wider than the frame width to provide additional thigh support without increasing overall width of the chair.
- 4) Custom seat depths must be between 16"D and 20"D.
- 5) The Ischial Pelvic Alignment System (IPAS) will allow 1" fore/aft (+/-) adjustment of the aperture location and seat depth on custom seats. On the molded 23"W x 18"D seat, the IPAS will allow the aperture location to be adjusted up to 2" forward with a corresponding seat depth range from 18"D to 20"D.
